I purchased a 86 GP 2+2, a few months back, always wanted one, now I have it. Its a very clean car with decient miles, 58000, and its in great unrestored condition, No rust, perfect under carradge, The interior is decient, but Door panels are incorrect, Not sure how that happened, and dash is also altered, Its missing the analog clock on the pass side. Only thing I can figure is, the dash cracked, and they got a used one from a GP, and door panels are also from GP, So does anyone know where I could find correct ones? Other than that, the car is mostly unmolested.
