I received this message from the original owner's son. Please chime in with any info or suggestions as to how he can trace the car:

My fathers name is Donald Edward Campbell he lives in Maryland . He was Living around the Millersville / Severn area. The car was a bronze color and the interior was a brownish. It had a 4 speed manual trans, and the 421 with 3 deuces. He can't remember if he sold it privately or traded it in. Do you know if the MVA could get the vin # or do you know of any company that could find it. Contact me with any info you have.
