I received this request from a '64 2+2 owner:

"I need some assistance on my 64 2+2 inside door panels. The car as I bought it has no trim pieces where the carpet and the door panel intersect. Most folks I talked to at POCI said they thought that it would have originally had a trim piece on each door. Others were not sure. Can you or our 64 2+2v members answer that question and if they do require this trim piece, I need one for each door. Perhaps some members have a set they would be interested in selling. If you or our members have another source please advise."

Can anyone l	nelp?
