

Registry Update - vehicles by year

Posted by OldInjun - 2019/05/13 15:11

As of today, 5/13/19, the Registry is up to 383 cars.

By year:

1964 = 35

1965 = 116

1966 = 96

1967 = 42

Canadian 1967 = 12

Canadian 1968 = 8

Canadian 1969 = 15

Canadian 1970 = 4

GP 2+2 1986 = 55

For those who are nuts for statistics, you can search the Registry, sorting by year, body style, engine option, transmission. Just be aware that the accuracy of the search results are dependent on how registrants listed their car. I always remind people that we want to record the car as produced at the factory, which may vary from current condition (i.e. a change in carburetion, in transmission type, in engine size). Not everyone is diligent in how they list those options. If you think you made an error in your registration, please contact me and I correct it.

The other issue is a lack of complete information on VIN"s. I purposely did not make VIN submission mandatory, because some of you are a bit paranoid about sharing the info. If so, I would ask that you reconsider, because down the road someone may "inherit" your car and want to trace its history through the Registry. Without a VIN they won't be able to do so.
