

Resizing Digital Photos

Posted by Don - 2010/09/04 12:23

There have been a few questions and a little confusion about resizing photos for display on this (or any other) website. I've put together an article with some background information about why it's necessary, and pointers on how to get it done as quickly and easily as possible. It's filed under "Articles / Miscellaneous", here. Hope it proves useful!

I'm no computer whiz, & haven't been able to figure how to make pictures "smaller" The POCl, Canadian Poncho site & others have all taken the pictures I submit with no problems, so I guess there won't be any "avitar" or others. For some strange reason I was able to down load Pics of the 2+2 for Gallery, from same file as all the rest????? Pete
