

1966 Body Panels

Posted by OldInjun - 2010/09/06 16:08

I just received a call from a new owner of a '66 coupe, located in Wisconsin. His new baby got treated to a "mudbath", so he is in need of some new rear quarters or patch panels. Any suggestions on where he can source the body parts would be helpful. Also, maybe some of you can recommend a good body shop in that area to do the bodywork and paint for him.
