

1966 2+2 Pinstripe

Posted by OldInjun - 2011/08/05 15:37

Several Registry members are sitting here at Norwalk debating the correct factory configuration for 1966 pinstripes.

I am asking for assistance in getting a clear photograph of a '66 2+2 survival with original paint & stripe. Can anyone help?

This was what I found on PY from a while ago: The stripe is double, with the top stripe 1/16 inch, bottom stripe is 1/8 inch & it runs about 1/4 inch above the moulding.

Just took a look at Harry Samuel's original '66 C+I deck and product book -- the portion that describes the paint stripe is "XXX" -ed out. It was an addendum to the book after the first printing, listing colors, interiors, combinations, etc.

I would like to see that book.

If you are attending Norwalk, please bring it with you.
