

spark pluggin

Posted by john - 2011/08/13 17:14

hey guys, what type spark plugs are you all using on your 421s, happy with, tried, avoided, champion 44/45?..other...

and how bout plug wires? give us some feedback, don't make old injun do all the work!

John

I'm using AC's simply because they look correct. Have put 10K+ miles on them in 2 years (including a bunch of 1/4-mile trips) with satisfactory performance.

As for wires, I'm using dated coded repro's from Ames.

which ACs,44?/45s? some plugs run hotter, seems some switch from ac to champion, would stick vs auto make a difference?, or using 068 cam?

anyone besides old injun who can step up to offer some info?.....
