

'65 421 H.O. engine on Ebay

[Click here for link](#)

Complete from Tri-Power carbs to pan (except one exhaust manifold missing)- if you need an authentic engine, these don't come up very often. Carb linkage appears incorrect.

Not that anyone cares, but coincidentally his heads have the exact casting date as my car's engine block - 11/12/64.

fyi it is a YK HO.

Cannot see the transfer lug in the picture. Maybe save and enlarge might help. Just a thought.
