

## Several non-2+2's for sale

---

no, they're not 2+2's, and not all Pontiac's, but I thought I would share this message from John Gunnell for those who have eclectic taste in their collectible cars:

"In the past few weeks we've had a rash of collector car enthusiasts asking us to help them find new owners for their cars for a variety of different reasons. We did find the perfect new owner for an MG Midget with the seller getting her price and the buyer getting a neat car. The kicker was that the buyer was from the seller's original hometown. Funny how these things go.

### 1986 PONTIAC TRANS AM

In another news blog a few days ago we described this car in detail. It is an almost perfect specimen of this model or type of car. It looks brand new, runs perfect and has 50,000 miles. The \$17,000 asking price is high but it is worth it because it is such a great SURVIVOR car. It will be a trophy winner for the next owner. And the owner is willing to listen to offers.

### 1964 OLDSMOBILE CUTLASS 2D HARDTOP

This is a car that the owner out put two times what he needs to get into the restoration. It is red, it is nice and the Olds brand has been really catching on since the nameplate was discontinued by GM. Since the restoration didn't come out perfect, the car needs just a little TLC, mostly on the dashboard.

### 1963 PONTIAC CATALINA CONVERTIBLE

We just saw this one yesterday and the owner hasn't set a price or communicated her precise wishes because it's an estate car and she has other things to think about, too. It is an older restoration. It definitely needs a new top and some minor interior work. No rust and the paint looks good under the dust. For anyone looking for this type of car and willing to do clean up and touch up, this will probably be a fantastic deal.

If you are interested in any of these call us at 715 281 5925 and we can hook you up with the owner on serious offers."
