

1986 2+2 exhaust

Posted by 2+2=10 - 2014/02/14 23:47

Did the 1986 GP 2+2 come with dual or single exhaust? Mine has single. What dual kit would bolt right on? Would the Monte Carlo dual exhaust bolt on as they are pretty much the same car with the same engine. Thanks.

I am not an expert on the 1986 models, so I took the time to pull a list for you of those who have registered theirs (listed by last name, first name, user name, email). Unfortunately not enough members pay attention to the forum, so you might want to reach out to these people to get your question answered. If you find out the answer, please post it here for others.
